EDUCATION

University of Wisconsin–Madison | Madison, WI **September 2025 - May 2029**

B.S. in Computer Engineering

Relevant Courses: Electrodynamics, Data Structures and Algorithms, Calculus 2

EXPERIENCE

OktoRocket | Franklin, TN **April 2022 - Present**

Software Engineering Intern

- Refactored and improved a legacy React app used by thousands of clients, resolving business-impacting issues and implementing up-to-date standards.
- Optimized core features that supported scaling from ~50 to 1,000+ locations, contributing to 275% year-over-year ARR growth and 44% expansion in H1 2025.
- Platform stability improvements enabled handling 2M+ texts and 30K+ hours of audio transcription monthly.

Hydrant Pay | Los Angeles, CA **July 2024 - July 2025**

Founding Software Engineer

- Designed and programmed effective user interfaces for influencer talent agencies to process invoices and calculate contract payment splits, allowing the business to rapidly scale by reaching new markets as agency partnerships scale.
- Architected backend workflows integrating with financial providers to support early invoice payments, directly contributing to processing $500K+ in billing for 50+ clients within the first months of launch.

Tamarak Day Camp | Lincolnshire, IL **June 2022 - July 2025**

Lead Summer Camp Counselor

- Led, instilled confidence, respect, and honesty with groups of 15+ six-year-old campers.
- Mentored 20+ junior counselors in conflict resolution and leadership.
- Flew 10+ drone operations, capturing photos and video for social media marketing.

PROJECTS

stevenson.space | JavaScript, Vue.js **Feb. 2022 - May 2025**

- Solely maintained and grew the student-run school information website to 10K MAU and 20% YOY growth.
- Engineered infrastructure to stream and showcase student-produced music and album artwork, publicizing over 30 submissions.

SHSMaps | Javascript, React.js, TailwindCSS **Mar. 2023 - May 2025**

- Designed and developed a frontend website used by 5K+ students and 120+ teachers at Stevenson High School
- Built an OCR system to scan class schedules and provide turn-by-turn directions, allowing users to generate over 11K directions to classes in a 1M+ sqft high school campus.

TECHNICAL SKILLS

Languages: Typescript/JavaScript, Dart, Python, Java, Swift
Technologies: Node.js, React.js, Vue.js, Flutter, TailwindCSS, Git, Docker, REST APIs
Tools: GCP, Stripe, Cloudflare, Cursor, GitHub, AWS

LEADERSHIP EXPERIENCE

Windy City Hacks **July 2024**

- Organized a 100-person high school hackathon in the Chicagoland area, inspiring a cross-sectional community of students to generate unique solutions to make education more engaging.
- Raised $4,000+ from corporate sponsors such as AWS, Vercel, and Hack Club.
- Directed event operations end-to-end, managing logistics, budgeting, and team coordination.
