EDUCATION

University of Wisconsin–Madison **May 2029**
B.S. in Computer Engineering

EXPERIENCE

AeroVironment | Centreville, VA **June 2026 - August 2026**
Software Engineering Intern

- Architected and programmed a 16-bit IR video recording pipeline in Rust using GStreamer, FFmpeg, with custom processing plugins for raw capture, encoding, compression, and per frame timestamps on embedded Linux devices.
- Designed, prototyped, and tested a hardware and software package intended to measure average "glass to glass" latency from EO and LWIR cameras, automated with OpenCV and GStreamer.
- Developed a Python-based EO/LWIR video tool that can superimpose one camera's field of view into the feed of another, doubling data annotation efficiency synchronizing clips utilizing MISB 0604 timestamps.

OktoRocket | Remote **April 2022 - August 2025**
Software Engineering Intern

- Refactored and improved a legacy React app used by thousands of clients, resolving business-impacting issues and implementing up-to-date standards.
- Optimized core features that supported scaling from ~50 to 1,000+ locations, contributing to 275% year-over-year ARR growth and 44% expansion in H1 2025.
- Platform stability improvements enabled handling 2M+ texts and 30K+ hours of audio transcription monthly.

Hydrant Pay | Remote **July 2024 - July 2025**
Founding Software Engineer

- Crafted and implemented effective user interfaces for influencer talent agencies to process invoices and calculate contract payment splits, allowing the business to rapidly scale by reaching new markets as agency partnerships scale.
- Architected backend workflows integrating with financial providers to support early invoice payments, directly contributing to processing $500K+ in billing for 50+ clients within the first months of launch.

PROJECTS

SHSMaps | Typescript, React, TailwindCSS **March 2023 - May 2025**

- Built an OCR system to scan class schedules and provide turn-by-turn directions.
- Designed and developed a website used by 8K+ students and 250+ teachers, generating over 14K directions.

stevenson.space | Typescript, Vue, TailwindCSS **February 2023 - May 2025**

- Solely maintained and grew the student-run school information website to 10K MAU and 20% YOY growth.
- Engineered infrastructure to stream student-produced music and album artwork, publicizing over 30 submissions.

LEADERSHIP EXPERIENCE

Windy City Hacks | Chicago, IL **July 2024**

- Organized a 100-person high school hackathon in the Chicagoland area, inspiring a cross-sectional community of students to generate unique solutions to make education more engaging.
- Raised $4,000+ from corporate sponsors such as AWS, Vercel, and Hack Club.
- Directed event operations for 100 attendees end-to-end, managing logistics, budgeting, and team coordination.

TECHNICAL SKILLS

Languages: Typescript/JavaScript, Python, Rust, Java, Dart, Swift
Technologies: React, Vue, TailwindCSS, OpenCV, Flutter
Tools: Linux, Git, Docker, FFmpeg, GStreamer, GCP
